

EUROLUB ÖLBINDER UNIVERSAL (Grobkorn)

ÖLBINDER UNIVERSAL binds liquids of all kinds on any solid surface. Even with complete saturation of the granules optimum skid resistance is achieved. Universal, with its relatively large grain size, is a product that can be successfully used both outdoors and indoors for all daily absorption tasks. The granules can be used preventively or acutely in case of damage.

Application: <ul style="list-style-type: none"> - calcined - quick-acting - easy to hang up 	<p>Universal can be used preventively or in case of damage, is easy to spread and to brush up again. Universal is effectively screened, therefore has a very low content of small particles and is therefore safe to use under all conditions.</p> <p>The thermal treatment (calcination) means that the granules remain hard even after complete saturation. Liquids are effectively absorbed and encapsulated, and the surface becomes clean and dry.</p> <p>Disposal will take place either through the landfill or incinerator in accordance with applicable regulations for the liquid in question.</p>
